Preliminary Remark

As a result of the increased number and volume of recent surveys connected with the Eurobarometer survey series, the Inter-university Consortium for Political and Social Research (ICPSR) and the Zentralarchiv für Empirische Sozialforschung (ZA) have entered into a co-operative arrangement for the production and distribution of these important data collections. The present codebook is a product of this joint endeavour. Under this agreement, ICPSR and ZA alternately assume responsibility for the production of each survey. In this way all users will receive Euro-Barometer data sets and codebooks in identical standard formats although each archive will employ its own study number to identify each survey.

Since this co-operation presupposes common standards for data and codebook preparation, the formatting may in some details diverge from the usual ICPSR or ZA standards. For example, all frequency tables in this codebook are based on unweighted data while ICPSR codebooks generally contain only weighted frequency counts.

Bibliographic Citation

Publications based on ICPSR or ZA data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Request for Information on use of ICPSR/ZA Resources

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR/ZA participants' research activities, users of ICPSR/ZA data are requested to send to ICPSR or ZA respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

Data Disclaimer

The original collector of the data, ICPSR, ZA and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

The Eurobarometer (a.k.a. Euro-Barometer) Survey Series

The Eurobarometer surveys are the fruit of a unique program of cross-national and cross-temporal social science research. The effort began in early 1970, when the Commission of the European Communities began to carry out simultaneous surveys of the member nations of the European Community. Early efforts continued with two more surveys of the member nations in 1971 and 1973. In 1974, the Commission of the European Communities officially launched the biannual Eurobarometer series of surveys, conducted in the Spring and Fall of each year. These surveys are designed to provide regular monitoring of the social and political attitudes of the publics in the European Community member nations, now twelve in number. Of primary concern are public awareness of and attitudes toward the Common Market and other European Community institutions and policies. Special topics of interest, such as consumer attitudes, the environment, gender roles, energy problems, poverty or health-related issues, have also been investigated intermittently.

Eurobarometers available from ICPSR/ZA:

- European Communities Study, 1970 (ICPSR 7260 / ZA 0626)

(*) Preliminary edition without machine-readable codebook

This series of surveys was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr. Karlheinz Reif has directed the "Surveys, Research and Analysis" division of the Commission of the European Communities (European Commission) under the Directorate General for "Information, Communication and Culture" (DG X), together with Dr. Anna Melich and Eric Marlier.

Starting with Eurobarometer 38.0 the ICPSR and the ZA are co-operating in the cleaning and processing of the study. Identical datasets, SPSS setups and English-language codebooks will be distributed by both archives. Further information on the Eurobarometer survey series is available through the World Wide Web, via Zentralarchiv URL: <http://www.za.uni-koeln.de>.

Study Description

This round of Euro-Barometer surveys queried respondents on standard Euro-Barometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on the election of the Parliament for the European Union, which occurred in June of 1994. EU matters covered included the respondents' general attitudes toward the European Union and, in particular, their interest in European politics, general efforts to unify Western Europe, their own country's membership, their level of satisfaction with how democracy was working in the EU and in their own country, and the level of involvement of the EU in important issues of the day. Questions on the EU Parliament election asked participants if they had voted in the election, and, if so, for which party they had voted. Respondents were also queried about their attitudes toward female candidates in the election, their feelings about important public figures in general, the role of women in decision-making roles within the institutions and organizations of the EU, the role of political campaigns in the election, and their interpretations of the importance of the results. Respondents commented on how strongly they thought of themselves as Europeans, their attitudes toward a single European currency, feelings about the unemployment problem and the possible need for a massive government program to tackle the problem, opinions on border controls and other political issues and problems, feelings about immigrants, the future role of Germany in the EU, and their level of confidence in the decisions of the EU. They also described the good and bad points of the European Parliament, its power, its effects on the lives of individuals, and whether the EU should develop into a United States of Europe. Demographic and other background information was gathered on the number of people residing in the home, size of locality, household income, trade union membership, region of residence, and occupation of the head of household, as well as the respondent's age, sex, marital status, education, occupation, work sector, religion, religiosity, subjective social class, and left-right political self-placement.

Special Release: European Election Study 1994

Please notice the special release of codebook and data sets of European Election Study 1994 (ZA study numbers 2866-2869). A number of pertinent variables from Eurobarometer 42 are documented and included here. The complete study essentially consists of a survey conducted immediately after the European Parliament election of June 1994 in the framework of Eurobarometer 41.1. In addition pertinent variables from Eurobarometers 40 and 41.0 are also included. Identical questions have been asked in all member states of the European Community, some of them have been included in two, a few in three or four of the interviews. As a consequence the study offers wide opportunities for comparative and longitudinal analyses of voter behavior and voter orientations. Longitudinal analysis are particularly supported by the fact that 1994 study contents are partially overlapping with those of the European Election Study 1989 (ZA study number 2320).

The special data release EES 1994 was prepared in the framework of the 'European Elections Study Research Group' by Hermann Schmitt (Mannheimer Zentrum fuer Europaeische Sozialforschung, University of Mannheim), Franz Urban Pappi (University of Mannheim), Cees van der Eijk (University of Amsterdam) and Evi Scholz (ZEUS, University of Mannheim) in collaboration with Pilar del Castillo (UNED, Madrid), Roland Cayrol (CEVIPOF, Paris), Mark Franklin (University of Houston), Renato Mannheimer (University of Genova), Michael Marsh (Trinity College, University of Dublin), Karlheinz Reif (European Commission), and Colette Ysmal (CEVIPOF, Paris).

Sampling and Fieldwork

From June 11 or 13 to July 8, 1994, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

In all, Eurobarometer 41.1 interviewed 13,096 citizens of the 12 countries in the European Community (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes.

The firms responsible for carrying out each national survey are shown below, together with interviewing dates for each country. Users should contact these organizations for more detailed information regarding sampling methods.

Weighting Information

Ten weight variables are provided in this dataset: four Nation Weights (WEIGHT RESULT FROM TARGET, WEIGHT ADJUSTED TO STANDARD SIZE, WEIGHT SPECIAL UNITED KINGDOM, WEIGHT SPECIAL GERMANY), and six European Weights (WEIGHT EURO 6, WEIGHT EURO 10, WEIGHT EURO 12, WEIGHT EURO 12+).

Nation Weights incorporate post-stratification adjustments based on crosstabulations of national populations by sex, age, region, and size of locality. In some countries, cross-tabulations of a higher dimension were used, by cross-tabulating with additional variables. Data for post-stratification were provided by EUROSTAT and the survey firms in each country. WEIGHT RESULT FROM TARGET and WEIGHT ADJUSTED TO STANDARD SIZE are for use in separate analyses of individual countries.

WEIGHT RESULT FROM TARGET reproduces the real number of cases for each country. British and Northern Irish as well as East and West German samples are weighted separately. This weight is corresponds to former NATION WEIGHT II (up to Eurobarometer 31).

WEIGHT ADJUSTED TO STANDARD SIZE is equivalent to WEIGHT RESULT FROM TARGET adjusting all samples to the standard size of 1000 cases (respectively 300 for Northern Ireland and 500 for Luxembourg).

WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included and (unlike the corresponding former NATION are included and (unlike the former NATION WEIGHT I up to WEIGHT I up to Eurobarometer 31) all samples are adjusted to the standard size.

WEIGHT SPECIAL GERMANY adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever the united Germany is to be analyzed as a whole.

EURO WEIGHT 12+ includes an adjustment of each national sample in proportion to its share in the total population of the European Community, ages 15 and over. These post-stratification adjustments were based on population figures published by EUROSTAT in the Regional Statistics Yearbook. EURO WEIGHT 12+ is intended for use in analyses of the European Community nations as a whole.

EURO WEIGHT 12 is similar to EURO WEIGHT 12+, but excludes East Germany. In addition EURO WEIGHT 10 excludes Spain and Portugal. EURO WEIGHT 6 only refers to the six EC founder members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). The European weights equal zero for all excluded countries.

All European Weight Variables include the national weighting factors for each sample and - unlike the former EUROPEAN WEIGHT up to Eurobarometer 31A - also contain the adjustment to the standard sample size.

Table: Number of Respondents and Sums of Weights

	Number of Respondents	Sum of WEIGHT UK	Sum of WEIGHT GERMANY	Sum of EURO WEIGHT 12+
France	1.000	1.000	1.000	2.077
Belgium	1.003	1.000	1.000	398
The Netherlands	1.005	1.000	1.000	535
Germany	2.134	2.000	2.000	3.130
Germany (West)	(1.082)	(1.000)	(1.583)	(2.482)
Germany (East)	(1.052)	(1.000)	(.417)	(.648)
Italy	1.067	1.000	1.000	2.120
Luxembourg	502	500	500	18
Denmark	1.000	1.000	1.000	195
Ireland	1.000	1.000	1.000	121
United Kingdom	1.383	1.300	1.300	2.162
Great Britain	(1.078)	(1.268)	(1.000)	(2.107)
Northern Ireland	(305)	(.32)	(.300)	(.55)
Greece	1.002	1.000	1.000	356
Spain	1.000	1.000	1.000	1.338
Portugal	1.000	1.000	1.000	350
Total	13.096	12.800	12.800	12.800

NOTE: Sums are rounded to the nearest whole number.

- <1> Indicates the variable number. A serial variable number is assigned to each variable in the data collection.
- <2> Unique MNEMO-technical abbreviations are assigned to selected main trend variables in the data collection. This feature is not yet available in the present edition.
- <3> Indicates the abbreviated variable name (maximum of 40 characters) used to identify the variable for the user. These variable names are identical to corresponding SPSS variable labels. The variable label usually includes the question number assigned in the questionnaire.
- <4> Indicates the starting location and width of this variable when the data set is stored. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "Q3 DEMOCRACY SATISFACTION" is 1 column wide.
- <5> Indicates the code values of missing data. In this example, 0 (MD1) and 5 (MD2) or any code greater than 5, are missing data. Most analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role and modify the corresponding SPSS definition if so desired.
- <6> Indicates the number (n) of decimal places defined for the respective variable.
- <7> This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the wording of the questionnaire item.
- <8> Comments in brackets are references which do not appear in the original questionnaire. They delineate explanatory text added by INRA or ZA/ICPSR. In this case the last appearance of the present question is referenced; in the case of multiple response variables the corresponding full text (question) is referenced.
- <9> Indicates the code values occurring in the data for this variable.
- <10> Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Don't Know), "NA" (Not Ascertained), and "Inap." (Inappropriate).
- <11> The absolute frequencies for each country refer to the number of cases in the unweighted dataset. The relative frequencies for each country refer to the valid cases, i.e., the unweighted total number of cases reduced by the number of cases defined as missing data (M). The Sum refers to the total number of each country's cases in the unweighted dataset. Please notice that unlike other ICPSR codebooks all tables contain unweighted frequency counts.

Data Preparation and Formatting

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, AGE RECODED, AGE EDUCATION RECODED and REGION II. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

The data file for this Eurobarometer is available from ZA with a single logical record of 541 columns per respondent. The machine-readable (or hard-copy) codebook and SPSS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling.

V1 STUDY NUMBER

Location: 1
Width: 4

Archive Study Number

<Respective study number of the involved archive.>

V2 EDITION NUMBER

Location: 5
Width: 1

ZA Edition Number

<The number identifying the release edition of this dataset.>

1. Early release version
2. 1st codebook edition

V3 PART NUMBER

Location: 6
Width: 1

ZA Part Number

<The number identifying this part of a 1-part study.>

1. EUROBAROMETER 41.1

V4 ID SERIAL NUMBER

Location: 7
Width: 5

Sequential respondent identification number assigned by ZA

<A unique serial number is assigned to each respondent.>

V5 NATION I (UNITED KINGDOM)

Location: 12
Width: 2

Nation of interview I

<Twelve EC countries including separate samples for East and West Germany>

		Ungewichtet	
		Abs.	%
01.	France	1000	7.64
02.	Belgium	1003	7.66
03.	Netherlands	1005	7.67
04.	Germany - west	1082	8.26
05.	Italy	1067	8.15
06.	Luxembourg	502	3.83
07.	Denmark	1000	7.64
08.	Ireland	1000	7.64
09.	United Kingdom	1383	10.56
10.	Greece	1002	7.65
11.	Spain	1000	7.64
12.	Portugal	1000	7.64
13.	Germany - east	1052	8.03
		<u>13096</u>	<u>100.00</u>

V6 WEIGHT SPECIAL UNITED KINGDOM

Location: 14
Width: 7 Decimal Places: 4

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

<This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included. -

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.>

V7 NATION II (GB AND NORTHERN IRELAND)

Location: 21
Width: 2

Nation of interview II

<The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.>

	Ungewichtet	
	Abs.	%
01. France	1000	7.64
02. Belgium	1003	7.66
03. Netherlands	1005	7.67
04. Germany - west	1082	8.26
05. Italy	1067	8.15
06. Luxembourg	502	3.83
07. Denmark	1000	7.64
08. Ireland	1000	7.64
09. Great Britain	1078	8.23
10. Northern Ireland	305	2.33
11. Greece	1002	7.65
12. Spain	1000	7.64
13. Portugal	1000	7.64
14. Germany - east	1052	8.03
	13096	100.00

V8 WEIGHT RESULT FROM TARGET

Location: 23
Width: 7 Decimal Places: 4

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

<This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. -

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.>

V9 WEIGHT ADJUSTED TO STANDARD SIZE

Location: 30
Width: 7 Decimal Places: 4

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

<This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.>

V10 NATION III (UNITED GERMANY)

Location: 37
Width: 2

Nation of interview III

<East and West Germany are coded together: United Germany.>

		Ungewichtet	
		Abs.	%
01.	France	1000	7.64
02.	Belgium	1003	7.66
03.	Netherlands	1005	7.67
04.	Germany	2134	16.30
05.	Italy	1067	8.15
06.	Luxembourg	502	3.83
07.	Denmark	1000	7.64
08.	Ireland	1000	7.64
09.	Great Britain	1078	8.23
10.	Northern Ireland	305	2.33
11.	Greece	1002	7.65
12.	Spain	1000	7.64
13.	Portugal	1000	7.64
		13096	100.00

V11 WEIGHT SPECIAL GERMANY

Location: 39
Width: 7 Decimal Places: 4

Nation Weight III (WEIGHT SPECIAL GERMANY)

<This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.>

V12 WEIGHT EURO 6

Location: 46
Width: 7 Decimal Places: 4

European Weight I (WEIGHT EURO 6)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V13 WEIGHT EURO 10

Location: 53
Width: 7 Decimal Places: 4

European Weight II (WEIGHT EURO 10)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V14 WEIGHT EURO 12

Location: 60
Width: 7 Decimal Places: 4

European Weight III (WEIGHT EURO 12)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany (weighted by "zero"). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V15 WEIGHT EURO 12 +

Location: 67
Width: 7 Decimal Places: 4

European Weight IV (WEIGHT EUROPE 12 +)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. -

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.>

V16 Q1A ELECTORAL REGISTER

Location: 74 MD1: 0

Width: 1

Q.1a Are you ... (NATIONALITY)? (IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

<Last trend: EB41.0 Q.1>

1. At present address (GO TO Q.2)
2. At another address (GO TO Q.2)
3. Don't know if registered (GO TO Q.2)
4. Does not appear at all (GO TO Q.2)

5. Is not ... (NATIONALITY) <CLOSE INTERVIEW>

V101 Q31 EUROPEAN CITIZENSHIP FEELING - SCALE

Location: 160 MD1: 00
Width: 2 MD2: 11

(ASK ALL)

Q.31 As Well thinking of themselves as (NATIONALITY) or (ADD IF APPROPRIATE (NATIONALITY) AND/OR (SUBNATIONALITY)), or whatever, some people think of themselves ALSO as European. Others do not do so. How about you? (SHOW CARD)

Please choose between the two ends of the scale. If you fully agree with the opinion on the left hand side, you give a score of 1. If you fully agree with the opinion in the right hand side, you give a score of 10. The scores in between allow you to say how close to either side you are.

01. Not at all, also European
02.
03.
04.
05.
06.
07.
08.
09.
10. Very much, also European

V103 Q33 EC AND PEOPLE - RELY ON EUROP COMMIS

Location: 163 MD1: 00
Width: 2 MD2: 11

Q.33 Many important decisions are made by the European Union (European Community). They might be in the interest of people like yourself, or they might not.

To what extent do you feel you can rely on each of the following to make sure that these decisions are in the interest of people like yourself?
(SHOW CARD) Please use this Scale. (READ OUT)

Q.33a <European Union decisions and interests of people>

First, to what extent do you feel you can rely on the European Commission?

01. Cannot rely on it at all
02.
03.
04.
05.
06.
07.
08.
09.
10. Can rely on it completely

V149 Q45 EC EMPLOMENT POL PREFERNCE - RESP

Location: 237 MD1: 00
Width: 2 MD2: 11

Q.45 Another important problem for European Union (European Community) is unemployment. The President of the European Commission has proposed to raise funds for a massive employment programme in order to fight unemployment. Others argue that the completion of the Single European Market alone will promote economic growth and will be the best remedy for the current problems of unemployment. What is your opinion? Should the European Union (Euopen Community) launch a massive employment programme, or should it rather concentrate on the completion of the Single Market? (SHOW CARD)

Q.45a Where would you place yourself on this scale?

01. Launch a massive employment programme
02.
03.
04.
05.
06.
07.
08.
09.
10. Concentrate on completion of Single Market

V161 Q46 EC NAT BORDERS PREFERENCE - RESP

Location: 261 MD1: 00
Width: 2 MD2: 11

Q.46 Still another issue with the European Union (European Community) has to do with national borders. What do you think? Should European Union (European Community) continue to remove national borders and let people move freely between the countries, or should we re-introduce tighter border controls in order to be better able to effectively fight crime in (OUR COUNTRY)? (SHOW CARD)

Q.46a Where would you place yourself on this scale?

01. Continue to remove national borders
02.
03.
04.
05.
06.
07.
08.
09.
10. Re-introduce tighter border controls

V224 Q1_DK EC FUTURE - DENMARKS COLLABORATION

Location: 344 MD1: 5
Width: 1 MD2: 9

QUESTIONS FOR DENMARK ONLY

Q.1_DK I will now mention a number of views on collaboration with the EU (EC).

Which is closest to your opinion? (SHOW CARD)

1. Denmark should leave the EU (EC)
2. Regarding the collaboration with the EU (EC), each member country should have complete independence and have a right of veto on EU (EC)-decisions
3. Each Country should increasingly let the EU (EC) make the decisions and conform to the Union (Community)
4. The EU (EC) should, eventually, develop into a United States of Europe with a joint European Government

NO QUESTION D.28

D.29 We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups. (SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter <non-alphabetical, irregular order> of the income group your household falls into before tax and other deductions.

V365 C4 SOCIO PROF STATUS (OCCUPATION RECODE)

Location: 533 MD1: 0
Width: 2

C.4 SOCIO PROFESSIONAL STATUS

<Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15a) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15a). For those not in paid work, "former occupation" (D.15b) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21a) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21b) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. For more details see standard report EUROBAROMETER 41, July 1994, Brussels, A52 f.>

None of these (SPONTANEOUS).....		7,
DK.....		8,

EB41.1 - NEW

Q.40. (IF NOT VOTED: CODE 2 AT Q.14 - INTERVIEWER PLEASE CHECK BACK)
You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote ?
(SHOW CARD **)

I didn't really know what it was about.....	69	1,
As the European Parliament has so little power, I didn't think it was worth the effort..		2,
The problems talked about the most during the campaign were not the ones people are really interested in.....		3,
The political parties and candidates spoke too much about national problems and not enough about Europe.....		4,
You couldn't tell any more who was for or against the unification of Europe.....		5,
Whatever is done, the European Union (European Community) will never work.....		6,
The parties did not put forward a sufficiently balanced number of women and men as candidates.....		7,
As a woman, I didn't feel represented by the candidates put forward.....		8,
DK.....		9,

EB41.1 - NEW

Q.41. Would you have liked there to have been more female candidates put forward by political parties in these European elections in (OUR COUNTRY), or not ?

Yes.....	70	1
No.....		2
DK.....		3

EB41.1 - NEW

- Q.42. a) In an election, some parties win more seats and some parties win fewer seats. Some people say that it matters very little, other people say that it matters a great deal. Thinking about a European election like the one we have just had, where would you place your own view on this scale? (SHOW CARD**)
- b) And how about an election for the (NATIONAL) (PARLIAMENT - OR - NAME OF THE LOWER HOUSE OF PARLIAMENT)

	IT DOESN'T MATTER AT ALL										IT MATTERS A GREAT DEAL	DK
a) A European election	71 1	2	3	4	5	6	7	8	9	10	11

Party J	85 1	2	3	4	5	6	7	8	9	10	11	
Party K	86 1	2	3	4	5	6	7	8	9	10	11	

EB41.1 - NEW

Q.45. Another important problem for the European Union (European Community) is unemployment. The President of the European Commission has proposed to raise funds for a massive employment programme in order to fight unemployment. Others argue that the completion of the Single European Market alone will promote economic growth and will be the best remedy for the current problems of unemployment. What is your opinion ? Should the European Union (European Community) launch a massive employment programme, or should it rather concentrate on the completion of the Single Market ? (SHOW CARD **)

	Launch a massive employment programme										Concentrate on completion of Single Market	DK
a) Where would you place yourself on this scale ?	87 1	2	3	4	5	6	7	8	9	10	11	
b) And where would you place the (OUR COUNTRY) parties on this scale ? (READ OUT IN TURN LIMITED PARTY LIST)												
Party A	88 1	2	3	4	5	6	7	8	9	10	11	
Party B	89 1	2	3	4	5	6	7	8	9	10	11

	Yes, spoiling my vote.....		12
	Yes, not voting at all.....		13
	Don't know.....		14
	Refusal.....		15

EB 41.1 - NEW

Between June, 11 or 13 and July, 8 1994, INRA (EUROPE), a European Network of Market- and Public Opinion Research agencies, carried out wave 41.1 of the POST EUROPEAN ELECTION EUROBAROMETER, on request of the EUROPEAN COMMISSION and other participants.

The EUROBAROMETER 41.1 covers the population of the respective nationality of the European Union membercountries, aged 15 years and over, resident in each of the Member States, who registered to vote. The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EU country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from all "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the resident population of the respective EU-nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language.

COUNTRIES	INSTITUTES	N° INTERVIEWS	FIELDWORK DATES	POPULATION 15+ (x 000)
Belgium	MARKETING UNIT	1003	13/06 - 30/06	8 356

Northern Ireland	ULSTER MARKETING SURVEYS	305	14/06 - 30/06	1159

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from EUROSTAT population data. For all EU member-countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. As such in all countries, minimum sex, age, region NUTS II and size of locality were introduced in the iteration procedure. For international weighting (i.e. EU averages), INRA (EUROPE) applies the official population figures as published by EUROSTAT in the Regional Statistics Yearbook of 1989. The total population figures for input in this post-weighting procedure are listed above.

The results of the EUROBAROMETER studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text (English and French) on top; the results are expressed 1) as a percentage on total base and 2) as a percentage on the number of "valid" responses (i.e. "Don't Know" and "No Answer" excluded). All EUROBAROMETER datafiles are stored at the Zentral Archiv (Universität Köln, Bachemer Strasse, 40, D-5000 Köln 41). They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research. The results of the EUROBAROMETER surveys are analysed and made available through the Unit "Surveys, Research, Analyses" of DG X of the European Commission, "EUROBAROMETER", Rue de la Loi 200, B-1049 Brussels.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1.000 interviews, the real percentages vary within the following confidence limits :

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence limits	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.1%
